Who Am I?

Full Stack Engineer with 9+ years of experience building scalable applications. Focused on solving complex problems and delivering robust solutions with strong attention to functionality, design, and user experience. Enjoy working in collaborative environments that foster continuous learning and technical growth.

Tech Stack

BACK	FRONT	DB		AI
.NET Core (7) . NET (4.8) Node.js	React (17) Angular (7)	SQL Server MongoDB Firebase	Azure DevOps Github Actions Jenkins	Claude Code GitHub Copilot MCP LLM APIs

Work Experience

Full Stack Engineer — *Educaria, 2019 - Present*

Full Stack Engineer at Educaria, contributing to the development of Alexia, the leading educational platform for schools and universities in Spain and Latin America, powering web, Android, and iOS applications with 2M+ active users.

- **Frontend**: React, TypeScript, Ionic, Node.js
- **Backend**: .NET Core 7, IdentityServer, JWT, GraphQL
- **Database**: SQL Server, Entity Framework
- **Testing**: xUnit, Gherkin, BDD, K6 integration testing
- **DevOps**: Azure DevOps, Docker, Kubernetes, Git
- **Cloud**: Microsoft Azure, Google Firebase, Google Analytics
- **AI & Developer Tooling:** Claude Code Agents, GitHub Copilot, Model Context Protocol (MCP), AI-assisted development workflows

Led and contributed to the evolution of the platform from a monolithic architecture to a microservices-based system, designing and implementing .NET services following **Clean Architecture, SOLID, DDD, and CQRS**. Containerize services with Docker and manage the DevOps lifecycle using Azure DevOps and Kubernetes while building responsive React applications and robust APIs.
In the past year, focused on **AI-assisted development and automation**, integrating Claude Code agents, MCP workflows, and developer tooling to streamline engineering workflows and improve team productivity. Mentor junior developers and collaborate with cross-functional teams to deliver scalable, high-quality solutions.

Solutions Assistant — *NTT Data, 2017 - 2019*

Software Developer at NTT Data, working on a large-scale project for Repsol, developing mission-critical point-of-sale, handheld, and back-office systems used in gas stations across Spain and Peru.

Tech stack: .NET Framework 4.8, VB.NET, Angular, Node.js, SQL Server, PostgreSQL, Azure DevOps.

Contributed to development, unit testing, and documentation within agile teams, helping maintain reliable transaction processing systems for a large-scale retail infrastructure.

Education

Bachelor in Computer Engineering
Udima 2020-2026

Certificate of Higher Education in Web Application Development
CEEP 2015-2017

Professional Development / Courses

- Claude Code in Action, 2026
- AZ-204: Azure Developer Associate, 2025
- Prompt Engineering for Developers, 2024
- What the Hack - Azure OpenAI, 2024
- Machine Learning with Python, 2020

Languages: Spanish (Native) and English (Full professional, CEFR C1)

Freelance / Side projects

AI Agents, MCP, RAG & Context-Driven Development

Design AI-assisted workflows using **Claude Code** agents, **MCP**, and OpenAI-based **RAG** systems, building context-aware chatbots, **automation** tools, and small applications that improve productivity and streamline internal processes.

TextSage

Co-developed a speaker diarization system with a friend based on the Whisper encoder, extended with LSTM and embedding layers for multi-speaker classification, achieving performance comparable to PyAnnote.
Built the full stack around it, including an embeddings API and a React + Tailwind web app to manage API keys, usage, and diarizations, deployed on Vercel. Happy to provide access to the platform if you'd like to try it.
